Office Action Summary

Application No.

10/686,594

Applicant(s)

KONDO ET AL.

Examiner

Jack W. Lavinder

Art Unit

3677

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 01 December 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1 and 7-10 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1, 7-10 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date _____.
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____.

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 7, 8 and 9 have been rejected under 35 U.S.C. 103(a) as being unpatentable over Kondo, 4752992, in view of Carlile, 2112725.

Regarding claim 1, Kondo discloses a resin stopper (18) welded (col. 2, last paragraph) to a fastener tape (11). The resin stopper has an upper leg portion (18a) and a lower leg portion (18b), which sandwiches the tape (11), and a bent portion (13, figure 6). Kondo also discloses a bottom face (18b') of a welded end portion on a side of the fastener tape (11, figure 6) located below a bottom face of the fastener tape main body, i.e., the bottom surface of 18b' is located below the bottom surface of the tape (11). Kondo fails to disclose a protrusion on part of an outer peripheral face.

Carlile discloses a stopper (13) having a protrusion (19, 20) protruding from the bent portion of the stopper to prevent the slider from accidentally becoming disengaged (page 1, column 1, lines 18-24). It would have been obvious to a person having ordinary skill in the art to modify Kondo's stopper to have a protrusion extending from the bent portion in order to prevent the slider from accidentally becoming disengaged.

Regarding claims 7 and 8, Kondo discloses a resin stopper (18) welded (col. 2, last paragraph) to a fastener tape (11). The resin stopper has an upper leg portion (18a) and a lower leg portion (18b), which sandwiches the tape (11), and a bent portion (13, figure 6). Kondo also discloses a bottom face (18b') of a welded end portion on a side of the fastener tape (11, figure 6) located below a bottom face of the fastener tape main body, i.e., the bottom surface of 18b' is located below the bottom surface of the tape (11). Kondo fails to disclose a protrusion on part of an outer peripheral face.

Carlile discloses a stopper (13) having a protrusion (19, 20) protruding from the bent portion of the stopper to prevent the slider from accidentally becoming disengaged (page 1, column 1, lines 18-24). It would have been obvious to a person having ordinary skill in the art to modify Kondo's stopper to have a protrusion extending from the bent portion in order to prevent the slider from accidentally becoming disengaged.

Kondo in view of Carlile fails to disclose the protrusion formed on the surface of the bent portion. Kondo in view of Carlile discloses a rubber protrusion extending through an opening in the bent portion. It would have been an obvious design choice to position the protrusion on the surface of the bent portion in place of Carlile's stopper arrangement since it would perform the identical function of holding the slider. The motivation would be to simplify the manufacturing process by eliminating the step of having to form the hole in the bent portion and then positioning the protrusion in hole.

Regarding claim 9, Kondo in view of Carlile fails to disclose a curved-shaped protrusion. The references disclose the basic shape, i.e., an elongated rectangular-shaped protrusion (19, 20). It would have been obvious to a person having ordinary skill in the art to change the shape of Carlile's protrusion to be a curved-shape since the specification fails to disclose any criticality to the shape of the protrusion and either shape works equally as well as the other in holding the slider.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1, 7-10 have been rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The phrase "a protrusion on part of an outer peripheral face thereof except a side face in the length direction of the fastener tape" in the independent claims is indefinite. What is meant by "except a side face in the length direction of the fastener tape?" The outer peripheral face does not have a side face in the length direction of the fastener tape. What side face is the claim limitation is directed to?

Allowable Subject Matter

5. Claim 10 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Response to Arguments

6. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jack W. Lavinder whose telephone number is 571-272-7119. The examiner can normally be reached on Mon-Friday, 9-4:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Judy Swann can be reached on 571-272-7075. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
